

Empower Yourself LTD, in collaboration with the National Association of Black Engineers (NSBE) and the Tuskegee Airman Association, will be expanding its offerings of programs and opportunities in STEM related fields and interests. These programs and opportunities will supplement our primary financial and economic literacy programs during the summer with engineering and aviation provided through our summer STEM program within Brockton High School.

The second year of our summer program provides not only a foundation for new applicants, but continued and extensive growth for returning students. With online curriculum, access to and assistance with future STEM careers / scholarships / internships and opportunities through NSBE and an expanded aviation program which incorporates actual flight experience.

The summer program is available to students in grade 5 through 12, with the ultimate goal being an experience which provides students access to knowledge, experience, and individuals/organizations who can assist them in preparing for a career and education in STEM fields. Consequently, students who register for the program will be eligible to apply to the new youth chapter of NSBE operating within Brockton High School.
